

Good Morning Nashville – © 2019 Kaufman & Perri

Wake up let's get to something wild
Sun breaking hot outside the window
No more sweet sleeping by my side
Spilling your hair across my pillow

Tattoo 'round your shoulder says "come here kiss me"

I missed that in the night so let's get busy, rise with me, HUP!

Good morning Nashville, I'm loving all I can see of your city
You got me stirring, your smile, is like a song to my eyes
Good morning Nashville, hold on, till I can love you so pretty
It's just this woman beside me has got me so hypnotized
Oh good morning Nashville

What's going down on that Boulevard?
Look at them crowds on every corner
They're honky-tonkin' in that bar
But you're so hot I'm 'a dripping on ya

If we don't ever step out this hotel room
If the time, one time we stop, stop is to
Pull down the window shades on the world outside
Spend the whole weekend doin' Nashville
Right here inside, HUP!
