

Every Little Thing (But You) © 2017 – Kaufman & Perri

I could be happy here: this place has everything
Alligators in the swamp, tan fading from my ring
Cup 'a gumbos just a buck, happy hour, happy hours day and night
Man'd be a fool not, to thank, God he's alive

Had the best-laid plans, man I worked out everything
King size with an ocean view, my angel on my wing
Just one last check on my list needs attending to
Cause this place has everything, every little thing but you
It's got, every little thing but you
Yeah this place its got, every little thing but you

Big dance floors got the bass turned way up to ten
All the local girls are out dancing Salsa with their men
Any kind of place is right, for me, to drink away the night
In a corner with my dreams, of you, locked up inside

REPEAT CHORUS TO BRIDGE:

Never taste what's cooking till I been asked
Work my clothes off first save my hat for last
Had myself a golden rule to always treat you right
All it got me was a lousy tee shirt here in paradise, yep

Gets hot 'round here mid-day then the ocean breeze kicks on in
Met a walking girl last night might just walk her way again
See hanging out here ain't so tough, just one thing, one thing makes me blue
Cause this place has everything, every little thing but you

Its got, every little thing but you
Yeah this place its got, every little thing but you
Man this place its got, every little thing but you
Ah this place its got, every little thing but you
Every little thing but you
Every little thing, every little thing but you
Its got every little thing but you
