

We Come So Far – © 2017 Kaufman & Perri

Last girl I'd string along with a pack 'a lies and a love sweet song
Used to be I'd take you higher all lit up and playin' with fire
Won't be that man can't speak his mind lose my head start drivin' blind
We were wings on a shooting star how'd we ever wind up where we are?

We come so far, waitin' forever fallin' together fallin' in love so hard
Hotter than summer how we discovered the back seat of my old car
Could always take us wherever lookin' back never
Just windin' up where we are in love so hard we come so far

'Nother round 'nother glass 'nother way to make love last
Face the mirror 'hind the bar counting up my ev'ry scar
Can't help me now Lord see this through it's all on me what I'm gonna do
Draw a 'nother new hand of cards or play what we got girl where we are

CHORUS, BREAK

Last girl I'd string along with a pack 'a lies and a love sweet song
Used to be I'd take you higher all lit up and playin' with fire

CHORUS, OUTRO:

Yeah we come so far (waiting forever, coming together, falling in)
We come so far (hotter than summer ooh we discovered yeah lovin' it)
Yeah we come so far (could always take us wherever looking back never girl ownin' it)
We come so far (waiting forever, coming together, fallin' in)
We come so far, we come so far
